

# SAMARITAN'S PURSE WATER PROJECTS

Turning on the tap to safe water for communities. 

## A Step Further Fundraising for Samaritan's Purse Water Projects

### Provide a Family with Safe Water

Help provide safe drinking water by purchasing a BioSand Filter as a class, group or individual. This activity is intended to help you find creative ways to fundraise.

**Age group:** Grades K- 6

**Objective:** Encourage children to raise the \$150 it costs for a BioSand Filter.

**Explanation:** Children will brainstorm ideas as to how they can raise the \$150 it costs for a BioSand Filter. Under the leadership and supervision of a teacher or parent, the children will use their ideas to raise money for a BioSand Filter.

**Activity:** Children will be encouraged by teacher or parent to brainstorm ideas as to how they can raise the \$150 it costs for a BioSand Filter. The parent or teacher should provide viable suggestions to get kids started. For example, a bake sale, bottle drive, garage sale, or getting others involved.

**Get Creative:** Draw out a large BioSand Filter on a poster board. For every \$10 raised, draw a ceremonial horizontal 'water mark' on the filter, so the filter is 'full' when the \$150 goal is reached.
